Standard & Poor's Investment Services, a division of McGraw-Hill, Inc., is the premier supplier of financial information to the institutional investment community around the world. Standard & Poor's Compustat® is a standardized database delivering fundamental and market data on over 54,000 securities to clients through a variety of databases and analytical software products.

**Compustat North America** is a database of U.S. and Canadian fundamental and market information on more than 24,000 active and inactive publicly held companies. It provides more than 300 annual and 100 quarterly Income Statement, Balance Sheet, Statement of Cash Flows, and supplemental data items.

Standard & Poor’s offers a selection of Compustat North America files that are available in both annual and quarterly formats. The industrial annual formats offer both historical and restated data. The industrial quarterly formats offer restated data as reported by the company. The restated data allows analysts to compare current and prior years’ results on a comparable basis and determine financial trends and growth rates. For most companies, annual and quarterly data is available for a maximum of 20 years and 48 quarters (Compustat User's Guide, p.1).

Compustat North America files also contain information on aggregates, industry segments, banks, market prices, dividends, and earnings. For more detailed information on the Compustat files, consult the Compustat User’s Guide.

WRDS offers access to Compustat North American data through the Compustat FTP file dataset. Many Universities subscribe to Standard & Poor’s Research Insight℠ and Standard & Poor’s Market Insight® through the Library or Business School. See the links below for more on Research Insight and Market Insight, and contact your Library or School of Business to determine whether you have access to additional data using these options.
